To Talk Against Coffee.

To an ambitious student an ailment that intereferes with school and study is very hard to bear.

A bright young girl in Detroit, who had been poisoned by coffee, is now pursuing her studies in perfect health, Probably the coffee champions feel she should have continued to suffer and kept on with the coffee, but now and then there are self-willed creatures who lasist on getting well by leaving off caffee, deon getting well by leaving off caffee, de-serting the "toper's ranks" and joining

"From early childhood till a year ago I was in the habit of drinking three or four cups of coffee every day.

"As I grew older, the bad effects began to show themselves, although I had no idea that it was coffee that was doing the mischief. I became very nervous, and suffered so much from severe headaches that I lost much valuable time from my school and studies. The doctor could give me no relief—he probably did not suspect the coffee any more than I did.

"One day I went to visit a friend, and the coffee they had on their table tasted so good that I asked what kind it was, and they told me it was Postum Food Coffee. My friend said that her mother had been a nervous wreck from drinking the old kind of coffee, but had been restored to health by quitting it and drinking Postum. The whole family were enthusiastic about Postum and advised me to try it.

"I am glad they did; for it has given me back my health. At first we did not boil it enough and did not like it, but we soon learned how to make it, and now we all prefer it to the old kind. I have discovered that to stir a beaton egg in the warm milk we use instead of cream gives a most delicious flavor to Postum Food Coffee.

sition.
Subchairman H. R. Pollard, Jr., of the Finance Committee, presided at the joint session, Chairman J. B. Wood being detained by another engagement.
Superintendent C. E. Bolling, of the city water works, was heard. He had always thought it a good plan to establish an electric plant at the old pump house. He had not, however, made any definite calculations as to the cost of the plant, etc.

calculations as to the cost of the plant, otc.

Mr. Bolling said the time had come when the city would have to increase her pumping capacity. This was necessary, in order to prevent water famines at critical times. Mr. Bolling discussed the report of Mr. Trafford at some length, and seemed to agree with it in the main, endorsing it in nearly every feature. He said he had always believed the city should own her electric light plant, and it would be to the decided advantage of the city to combine her well defined envantages in these two departments. He had not considered the matter of cost to any extent, Still he thought, from a casual reading of Mr. Trafford's repetitat he was within proper lines as to cost. Mr. Bolling thought \$200,000 would be a fair price for the water department to receive for the old pump house.

In answer to a question by Mr. Pollard, Mr. Bolling said he was heartly in favor of establishing an electric light plant at this point. The matter went over until the Water Committee might have time to repert.
